

WUNDERBARTM

ARTICULATING TOW BARS (ATBs)

THE 21ST CENTURY OF TOWING:
FAST, SAFE, AND TERRAIN-READY.

PRODUCT OVERVIEW

The WunderbarTM Articulating Tow Bars (ATBs) from DPSG USA, Inc., revolutionize 21st-century towing by providing unparalleled speed, safety, and durability. These tow bars are specifically engineered to handle military and off-road vehicle recovery, offering reliable performance in challenging environments. Designed for ease of use, they connect vehicles on any terrain within seconds and stow away compactly when not in use, ensuring maximum efficiency and readiness.

UNMATCHED BENEFITS

WunderbarTM ATBs are designed to handle even the most demanding situations. Their unique capability to connect vehicles on uneven terrain, including while parked, ensures rapid deployment under any circumstances. This feature is particularly vital in military operations, where speed can mean the difference between success and failure. By enabling quick and safe towing, soldiers are free to defend downed vehicles during critical moments. These tow bars comply with the stringent AR-385-10 and STANAG 4478 standards, emphasizing safety and reliability. Their lightweight and compact design enhances portability, making them easy to transport and store. Built with corrosion-resistant materials, the WunderbarTM ATBs guarantee longevity with a minimum corrosion resistance of 4,000 hours. Best of all, they require no maintenance other than occasional cleaning with soap and water, reducing upkeep costs significantly.

KEY FEATURES FOR SUPERIOR PERFORMANCE WUNDERBAR™

Every aspect of the Wunderbar™ ATBs is engineered for practicality and reliability.

Rapid Deployment is swift and simple, requiring only one person to operate the system within seconds.

- ▶ **High Strength, Low Weight:** These tow bars combine high strength with low weight, meeting Mil Std. 1472 specifications. All components weigh under 50 pounds, except those for heavy tanks, which are capped at 75 pounds. This ensures ease of handling without compromising durability.
- ▶ **Universal Terrain Compatibility:** Wunderbar™ ATBs boast universal terrain compatibility, featuring the largest connection zones in the industry, ranging from 50,000 to 700,000 cubic inches.
- ▶ **Road Ready:** Approved for highway speeds, they enable seamless transitions from rugged environments to paved roads.
- ▶ **Compact Storage:** When not in use, mounting kits allow the ATBs to be securely stowed out of the driver's view, preserving visibility and convenience.
- ▶ **Field Proven:** Having been successfully deployed by the U.S. Army, Canadian Army, USMC, UK, and allied forces, these tow bars have a proven track record in real-world operations.

PRODUCT LINEUP

Model	Capacity	Material	NSN
DP007	7K Ultra-Light ATB	Aluminium	2540-01-658-6496
DP2000	20K Light ATB	Aluminium	4910-01-680-3097
